

EXCLUSIVE BIRDING ADVENTURE IN *Panama*

SUPPORT THE CONSERVANCY AS YOU FOLLOW THE BIRDS BEYOND THE DRIFTLESS

Join Emeritus Board Member Craig Thompson on this exclusive 11-night birding adventure to Panama, where many of the migratory birds we enjoy in the Driftless spend part of their annual journey.

Hike to secret locations with expert local guides as you discover birds, butterflies and other wildlife. At night, you will be immersed in nature in comfortable, unique ecolodges in one of the most biodiverse locations in the world.

As a bonus, after returning to Wisconsin your unforgettable birding experience continues in May with a complimentary guided field trip to Plum Creek Conservation Area near Wauzeka, where many of the same migratory birds return. This pair of field trips offers a rare opportunity to follow birds across two hemispheres.

A portion of every trip registration supports the Conservancy and helps protect the habitats migratory birds depend upon both in the Driftless Area and in Panama.
